## FALL OFFERING

OF

## AMAWALK NURSERY

## TREES

BY

J. C. MCCHRISTIE, TRUSTEE

AMAWALK

WESTCHESTER CO.

NEW YORK

## **MEASUREMENTS**

Deciduous trees are measured by their caliper, diameter of the trunk 6 to 12 inches from the ground. As no two trees will make the same growth, the height of deciduous trees is approximated in this price list as closely as possible. Evergreens are measured by their height only.

## **PRICES**

These prices are subject to change without notice and are F. O. B. Amawalk, New York. There will be an additional handling charge made for trees which we consider too large to be loaded on trucks and which necessitate special equipment for their moving. A discount of 33 1-3 per cent will be allowed from the prices quoted herein to all purchasers digging, balling and loading their own trees at Amawalk.

## **TERMS**

Our terms are cash. A credit of 30 days will be extended to those with a satisfactory bank reference.

## **DELIVERIES**

Deliveries can be made by either freight, express or motor truck. Packing is charged for at cost on express and freight shipments. Trucking charges are based on the quantity and distance of delivery.

AMAWALK is located in Northern Westchester County on Route 100, and the Putnam Division, New York Central Railroad. Amawalk is 8 miles east of Peekskill and 6 miles west of Katonah, and 1½ miles east of the Bronx River Parkway at Yorktown Heights.
